Perfect Pairings Guide

Each year, the Pantone Color Institute, the world's authority on color standards, introduces a color landscape reflective of cultural moods and fashion trends. This annual trend forecasting is embraced by interior designers and architects, as it offers consumers the chance to refresh their interiors by changing up their home décor and wall colors. Caesarstone surface colors and each year's trending colors work in unison to bring a room together without losing its timeless appeal.

This year's palette mixes bright and vivid colors with earthy tones.

To help you find inspiration for a color strategy that fits your unique style, Caesarstone has teamed up with color expert Kate Smith to show you how trending colors are expanding into home interiors and how they coordinate with our most popular surface colors to re-energize the home.

Create a stunning tonal or contrasting scheme with the help of this Caesarstone Perfect Pairings Guide.

The Influence of Color

Color can influence human emotions. It can lighten your mood, affect your health, improve your concentration, or help with productivity. It plays an integral role in interior design. Color is the easiest way to communicate your story and to infuse personality into your home's interior.

The concept of color in interior design is re-emerging in a big way. Bold, beautiful tones paired with neutral bases are replacing bright white spaces. Black, grey and white kitchens are getting a luxurious upgrade with a synthesis of colors.

Kitchen Trends

One trend that has staying power is the timeless classic of the pairing of neutral colors with bold, bright colors and earthy tones. Part of the allure of neutral colors like white, beige, grey and black is their quiet charisma when paired with different colors, textures, fabrics and surfaces.

From subtle tones and veining to more active variations, there is a Caesarstone surface to fit your personal design style.

White Kitchen

A white kitchen base lends an air of sophistication and timeless vibe to your living space. This neutral base has staying power, because it allows you to add trending colors to walls or as accents to keep the space fresh.

Grey Kitchen

Use a grey surface as a base and incorporate on-trend colors for subtle charm or a dramatic feel. A grey-based kitchen offers a chic, masculine or feminine sophistication that is stylish and inviting.

Black Kitchen

Like a little black dress, a black kitchen is a solid base that works with accessories to express your design personality. It can be masculine, playful or revival depending on how you choose to accessorize.

Pantone Colors

Greenery

The ‘Color of the Year’ is a yellow-green that is illustrative of flourishing foliage. It encourages experimentation and reinvigorates the spirit.

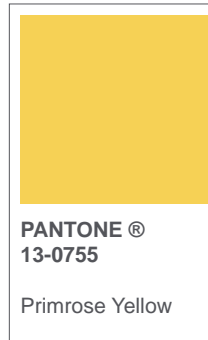

Kale

This lush and fertile dark green shade balances emotions and helps us connect with nature.

Lapis Blue

The confident, celestial deep blue was named for the semi-precious stone Lapis Lazuli—historically a stone of royalty.

Primrose Yellow

Inviting us into its instant warmth, this wildly joyful yellow shade is reminiscent of sunny days and good cheer as it shines with confidence.

Niagara

This classic denim blue color radiates feelings of ease and relaxation.

Island Paradise

A calming turquoise color that invites you to kick your feet up and unwind. It speaks to our daydreams of escaping to far-off destinations.

Pantone Colors

Flame

The fiery red-orange fills a room with fun-loving energy. It's vivacious and flamboyant.

Pale Dogwood

A quiet and subtle pink shade that engenders an aura of innocence and purity.

Pink Yarrow

A tropical, whimsical and vibrant hue that is high-spirited, flirty and fun.

Hazelnut

This pure shade brings to mind a natural earthiness. It's a transitional color that effortlessly connects the seasons.

Perfect Pairings – Caesarstone and Trend Colors

While your appliances, cabinets and Caesarstone countertops offer timeless longevity, paint and accessories can keep your living spaces on trend and can establish the exact mood you want. Use color powerfully and with intention.

In this guide, Caesarstone and color expert Kate Smith pair the **2017 trending colors of the year** with Caesarstone surface colors to help assist and inspire you in the processes of creating, remodeling or refreshing your kitchen, bathroom and other locations throughout the home.

Caesarstone Perfect Pairings

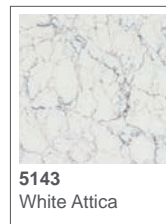

White Attica is a dramatic counterpoint to bright, crisp hues. The contrast of black, white and grey with these color pairings seamlessly merges modern and classic design elements.
